Family Health History Semester Project
Total Points: 100 points
Due Date: Monday November 19th, 2007
10-point deduction per day if late

This assignment will help you to understand the importance of your family health history. You will need to interview members of your family to evaluate your risks for disease and possible prevention strategies.

Expectations:

1. Complete the Family Health History Worksheet with first names (Last names and Middle names are optional).
2. All individual family history sheets should be filled out to the best of your ability. Find out as much information as you can. Have fun with this! The project will be returned in its entirety to the student after grading.
You should have the following number of sheets for each required group. Yellow is for Maternal and Green is for Paternal. **You are required to have 15 completed family history sheets.** If you have a problem acquiring information on a required person please see your teacher immediately for alternatives. Use first names only (Last names and Middle names are optional).
 - * Great Grandparents (8)
 - * Grandparents (4)
 - * Parents (2)
 - * Self
 - * Siblings
 - * Aunts & Uncles
 - * Cousins
3. Complete one final Tabulation Sheet for each side (Maternal and Paternal).
4. Fill out the Family Tree with first names only, (Last names and Middle names are optional) and include date of birth, date of death, if applicable for each person.
5. Complete Reflection Questions.
6. All the information in this project will remain confidential between teacher and student
